Sustainability Economics: Hermit Economics

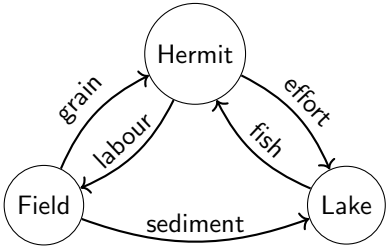

John Janmaat

October 9, 2026

Hermit System

- Hermit,
  - The social element of the social ecological system.
  - Contributes labour and consumes the fruits of that labour.
- Field,
  - One ecological element of the system.
  - Produces grain, with labour as the main input.
- Lake.
  - One ecological element of the system.
  - Produces fish, with fishing effort (time spent fishing) as the main input.

Hermit System

Mathematical Representation

$$f(x) = \alpha + \beta x + \varepsilon$$
